

# denis FALZARESÌ

Innovazione e design

I am Denis Falzaresi, a resin artisan, designer, and entrepreneur. I have been in this profession for **20 years**, leading a team of skilled collaborators every day.

## Artisan Designer

**One thing I am certain of, without innovation there is no future.**

Every year, I participate in courses and events related to my professional field to specialize more and more, and to develop innovative projects and ideas for all **interior spaces** of homes, B&Bs, hotels, pubs, restaurants, as well as for **floorings** and **outdoor** furnishings.

## Design Customization Creation

**These are essential steps to make your spaces unique.**

From collaborating with the client on shapes, colors, and materials, to selecting coverings, all the way to achieving the perfect solution.

**Craftsmanship and production capability.**

They enable innovative design projects and solutions. Thanks to collaborations with design studios and interior design firms, I continuously enhance my professional growth.

## Resin, marble and ceramics

**These materials are carefully chosen for their quality, durability, and aesthetics. They are customizable to create unique, elegant, and functional spaces in every room of the house.**

**Resin** is a highly versatile and modern material, resistant and easy to clean. It can also be molded to fit different shapes and dimensions, making it ideal for creating smooth surfaces, custom fur-

niture, and decorative details. **Marble** is a luxurious and timeless material that adds a touch of elegance and sophistication to domestic spaces. Its natural beauty and unique veining make it highly appreciated in interior design.

**Ceramics** are another very popular choice for domestic spaces. They allow for endless customization and can be used for floors, wall coverings, decorative tiles, and much more.

## Solution for **your bathroom and your kitchen**

I collaborate closely with the customer to study shapes, colors, and materials most suitable for his kitchen. When choosing coverings, **aesthetics and functionality** must always be considered. I strike the perfect balance, working in a team with my other professional collaborators, to obtain

the perfect solution for you. For the **bathroom**, I use multi-functional and eclectic products that can be directly applied to new or existing floors and coverings (such as tiles, marble, wood) **without generating dust**. It is ideal for delicate environments such as showers, bathtubs, and walls.

## fiberglass

An innovative technical fabric, specifically designed to meet the needs of spaces such as showers and humid spaces.

## Solutions for furnishing accessories

The design department studies new products every day, responding to the best **industry trends**.

From the reinterpretation of the classic to the ultramodern, we provide the customers with the personalized solution they are looking for.

## K Project

I have spent years refining my skills and experiences in the field. From this comes the desire to create a kitchen that is both **functional and aesthetically stunning**. K Project is my latest creation, an innovative idea for a kitchen that not only offers an exceptional culinary experience but is also a piece of art to admire. This kitchen, crafted like a treasure chest, fits perfectly into the space it occupies, and when opened, it envelops you in a **comfortable and elegant space**. Forget traditional cuisine and let yourself be enveloped by innovation in this incredible project.

**A unique kitchen and style, taking shape directly in your home space.**

## Make your spaces unique
